

Write a blog on Difference between HTTP1.1 vs HTTP2

HTTP/1.1

loads resources one after the other, so if one resource cannot be loaded, it blocks all the other resources behind it. In contrast.

HTTP/2

Is able to use a single TCP connection to send multiple streams of data at once so that no one resource blocks any other resource.

Write a blog about objects and its internal representation in JavaScript

Objects, in JavaScript, is it's most important data-type and forms the building blocks for modern JavaScript. These objects are quite different from JavaScript's primitive data-types(Number, String, Boolean, null, undefined and symbol) in the sense that while these primitive data-types all store a single value each (depending on their types).

Read about IP address, port, HTTP methods, MAC address

A MAC address is assigned to the network interface card by the manufacturer and is used for communication within the local area network. It is a globally unique address. An IP address is used for communication within the local area network and for communication between networks (usually through the Internet).
